

NEW MODEL DEVELOPMENT MANAGER (12 Months)

SALARY: FROM £45,000 DEPENDING ON EXPERIENCE

LOCATION: LATHOM, LANCASHIRE OR REDDITCH, WEST MIDLANDS

CLOSING DATE: 18th MAY 2018

WHO ARE WE?

The NSG Group is one of the world's leading manufacturers of glass and glazing systems in three business areas: Architectural, Automotive and Technical Glass.

Founded in 1918, NSG acquired the leading UK-based glass manufacturer Pilkington Plc in June 2006. Today, the Company has combined sales of just over JPY 629 billion, with manufacturing operations in 28 countries, sales in 130 countries, and employs some 27,000 people worldwide.

Our mission is to be the global leader in innovative high performance glass and glazing solutions, working safely and ethically.

THE ROLE

A 12 month temporary position has arisen for a New Model Development Manager based at Lathom, Lancashire or Redditch, West Midlands. The position will report to the Customer Service Team Leader and is within the Automotive OE Strategic Business Unit.

The purpose of the role is the management of new vehicle programmes from quotation to start of production and 6 months after. As part of this role, the successful candidate will have profitability responsibility and control of associated projects to ensure designs are delivered on time and to the correct quality standards for the total life of the vehicle.

The responsibilities for the role include:

- Being the first line interface with the customer for all commercial and technical aspects of the customer-supplier relationship
- Support the process of winning target business
- The management of cross functional teams and a variety of projects to deliver successful new model development launches
- The management of model year changes, engineering changes, product transfers and customer value improvement implementation

- Overall responsibility of allocated project management and accountable for success of change
- The project management of end of life for models - following EOP process
- The recovery of all customer project funding ensuring all correct processes are followed to ensure on time payments
- The integration of NSG with customer business systems
- Tracking tooling costs and controlling spend and tracking spend to plan

THE PERSON

Applicants should have a clear understanding of the Automotive industry, with a very good understanding of automotive glass and manufacturing processes. An engineering or numerate/technical discipline is also required.

Strong leadership capabilities are essential, with the ability to manage people remotely across the European region as well team projects. Excellent interpersonal and communications skills are also essential as the job holder will have to communicate with people at all levels so must be able to work well under pressure.

The successful candidate must also have the ability to define problems, collect data, establish facts and draw valid conclusion and must have financial knowledge and of internal cost systems.

BENEFITS

- 25 days holiday
- Monday – Friday
- 37½ hours per week
- Employee discount schemes and corporate memberships
- On site Car Parking
