Nippon Sheet Glass Co., Ltd.

NSG Group Launches New High-Performance Materials Website

NSG Group is pleased to announce the launch of its new "High-Performance Materials Website" (<https://hpm.nsg.com/en/index.html>), a communication platform for promoting the unique functions and values of its various functional glass products. The website defines "High-Performance Materials" as a group of glass products with different shapes from flat glass and introduces their features in an easy-to-understand manner by providing customers with necessary technical information and questions. In addition to Japanese, the site is also available in English and Chinese to meet the needs of customers around the world.

NSG Group has contributed to the advancement of differentiation and reliability of many customers in the sectors of ICT, materials, design, art, and healthcare through its only one glass material that takes advantage of the characteristics of glass, such as "light transmission," "light and strong," and "electricity resistance". As a pioneer in functional glass products, we will continue to support the creation of new value for our customers through communication via this website.

About NSG Group (Nippon Sheet Glass Co., Ltd. and its group companies)

NSG Group is the world's leading supplier of glass and glazing systems in the business areas of Architectural, Automotive, and Creative Technology.

Architectural manufactures and supplies architectural glass as well as glass for solar energy and other sectors.

Automotive serves the original equipment (OE) and aftermarket replacement (AGR) glazing markets.

Creative Technology comprises several discrete businesses, including lenses and light guides for printers and scanners, and specialty glass fiber products such as glass cords for timing belts and glass flakes.
