

PRESS RELEASE

8th July, 2016

The NSG Group to Exhibit at Glasstec 2016, Dusseldorf

The NSG Group, who manufactures glass under the Pilkington brand, will be exhibiting its latest innovations at the world's leading trade fair for the glass industry, Glasstec 2016, in Dusseldorf between 20th – 23rd September 2016.

Visitors to the stand (Hall 10, D34) will be able to explore the recently introduced value added products and innovative solutions suitable for a wide range of architectural projects, whatever their particular challenges and budget.

Headlining the stand will be a window unit containing Building Integrated Photovoltaics (BIPV) that allows a building to generate energy as an environmentally friendly alternative to the traditional energy sources. We will also be showcasing a new switchable glass that turns from opaque to transparent in an instant which is an ideal privacy solution.

The NSG Group will also unveil its new digital display mirror products and a special chromium based mirror, which is resistant to both corrosion and humidity. Coated with a highly reflective mirror coating, Pilkington **MirroView™** and Pilkington **MirroView™** 50/50 products are ideal for concealing digital displays and video screens when they are turned 'off'. When the display is turned 'on', the glass allows the display to show through. Pilkington **Mirropane™** Chrome is a very versatile chromium based mirror that can be used in a variety of interior and decorative applications such as bathrooms, hotel lobbies, health clubs or gyms, as well as façade panels, or in technical applications such as commercial refrigeration and lighting systems etc.

In addition, the company will showcase Pilkington **OptiView™** a new anti-reflective glass which offers many benefits including high light transmission, low reflection and UV blocking. Suitable in a wide range of traditional and new anti-reflective applications, in which clarity of view and a neutral colour is of paramount importance, such as display cases, retail shop fronts, showrooms, sports stadiums, cabinets or outdoor digital signage.

Visitors to the stand will also have the opportunity to find out more about the full product range presented in a new on-line Global Product Directory.

The NSG Group team at Glasstec is looking forward to meeting all customers and visitors who would like to know more about how Pilkington glass solutions can help them.

Visit us at the NSG Group booth #10-D34.

Note to editors:

The NSG Group is one of the world's leading manufacturers of glass and glazing systems in three major business areas: Automotive, Architectural and Technical Glass. Automotive serves the original equipment, aftermarket replacement, and specialized transport glazing markets. Architectural supplies glass for architectural and solar energy applications. Technical Glass products include very thin glass for displays, lenses and light guides for printers, and glass fiber, used in battery separators and engine timing belts. We have major market shares in most building and automotive product markets of the world, with a broad geographic reach, enabling us to respond to customers whose operations, particularly in the case of Automotive OE, are increasingly global. Geographically, 39 percent of the Group's sales are in Europe, 30 percent in Japan and 16 percent in North America, with the remaining 15 percent being generated in the rest of the world.
