

PRESS RELEASE

23 March, 2023

Finally, BAU again!

Meet the NSG Group team at BAU 2023, the world's largest fair for construction, architecture and systems, that will take place in Munich 17-22, April, 2023.

NSG Group is delighted to announce its presence at BAU 2023 in Munich. Under the motto "One Team – One Vision" the Group will present four work areas at a common stand. Colleagues from Pilkington Fire Protection Glass, Pilkington Special Applications, Pilkington Austria GmbH and Pilkington Bauglasindustrie (Pilkington **Profilit**[™] glass systems) will present their latest products for modern and demanding glass applications.

Fire-resistant glass with various combinations

There are areas of application in which not only the protection of human life and material assets play a decisive role, but also where additional properties such as an invisible appearance and colour neutrality are required. A visit to the "Earth" exhibit will provide you with the opportunity to experience first-hand the superb qualities of our anti-reflective glass Pilkington **Pyrostop**[®] 30-20 +AR.

Innovative glass solutions for façades

Our solutions for façades are both aesthetic and functional.

Pilkington **AviSafe**[™] is a glass with a unique patterned UV enhanced coating that allows birds to see a barrier. As a large-scale façade application, Pilkington **AviSafe**[™] contributes to bird protection while at the same time providing a stylish external appearance.

While visiting our stand, we also recommend researching our photovoltaic applications along with Pilkington **Sunplus**[™] BIPV for building envelopes that are expected to meet all other design requirements such as heat or sound insulation, weather protection or enhanced security, and much more, including energy generation. The glass not only offers excellent light transmission and g-values, but also contributes to the sustainable design of buildings and the achievement of climate targets.

Sophisticated and energy-efficient glass systems

Our varied channel glass Pilkington **Profilit™** is characterised by functionality, aesthetics and economy. We present two new products: Pilkington **Profilit™** "one in 2" with laminated safety glass and Pilkington **Profilit™** "one in 2" with translucent thermal insulation made of polycarbonate.

These products not only meet national and international standards and guidelines, but are also suitable for use in architecturally demanding projects.

Visit us at BAU 2023!

Please visit us at BAU 2023 from 17th till 22nd April 2023.

Our stand C3.328 will offer many interesting highlights and useful information will be available to you provided directly from our team.

We look forward to seeing you!

Note to editors:

About the NSG Group (Nippon Sheet Glass Co. Ltd., and its group companies)

The NSG Group is the world's leading supplier of glass and glazing systems in the business areas of Architectural, Automotive and Creative Technology. In 2006, it acquired the leading global glass supplier, Pilkington, and today, the Group has principal operations around the world and sales in more than 100 countries. Architectural manufactures and supplies architectural glass as well as glass for the solar energy and other sectors. Automotive serves the original equipment (OE) and aftermarket replacement (AGR) glazing markets. Creative Technology comprises several discrete businesses, including lenses and light guides for printers and scanners, and specialty glass fibre products such as glass cord for timing belts and glass flake.
