## WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural, Automotive and Technical Glass.

Our mission is to be the global leader in innovative high-performance glass and glazing solutions, working safely and ethically.

## THE ROLE

A member of the Thin Film Technology Group which is part of the global R&D function and is responsible for developing new coated products and processes to underpin the NSG Group's aim of growing its value added business and in providing technical support to the commercial and manufacturing teams.

The successful candidate will work as part of a team investigating new wet chemistry based coatings. They will work on several projects which may be short term incremental developments or longer term broader research projects. The candidate will be responsible for the deposition and screening of new coatings using laboratory equipment and will evaluate the performance of these coatings using a wide range of tests to assess them against international and internal standards.

The successful candidate will work within a multinational and multi-functional project team environment using a stage gate development process.

## WHAT ARE WE LOOKING FOR?

### You

- Graduate chemist however consideration will be given to non-graduates with extensive practical chemistry experience.
- Innovative, self-motivated team player
- Enjoys an active involvement in development and problem-solving activities
- Practical person who enjoys working both in a lab environment and in production facilities
- Experience of Microsoft Applications
- Willingness to travel to manufacturing facilities in Europe as part of the job
- Experience of coating technology would be advantageous.

### Benefits

- 25 days holiday
- Monday – Friday - 37½ hours per week
- Pension Scheme
- Employee discount schemes and corporate memberships
- Continual professional development and training
- On site car parking & canteen
- On site fitness activities and events

A full UK driving licence and car ownership would be an advantage due to limited public transport to the site.
