WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural & Solar, Automotive and Technical Glass.

Our mission is to be the global leader in innovative high-performance glass and glazing solutions, working safely and ethically and with a vision – “Changing Our Surroundings, Improving Our World”.

THE ROLE

The Procurement Graduate role is within our Global Energy Category Team, reporting to the Energy Category Specialist. The role is based at our UK head office in Lathom, West Lancashire.

Glass making is a significantly energy intensive process and the effective procurement of energy is essential to overall business competitiveness and environmental impact. The purpose of this role is to work alongside the Energy Category Specialist to develop strategies to decarbonize the Company’s energy supply and reduce its usage while maintaining plant operations, to negotiate supply contracts and to work alongside colleagues responsible for Sustainability and Climate Change in lessening the business impact locally and globally.

The successful candidate will work closely within the global Energy Procurement team, so the candidate must be prepared to undertake some overseas travel.

WHAT ARE WE LOOKING FOR?

You and your skills

The successful candidate will be a recent graduate with a minimum of a 2:1 degree who can demonstrate logical thinking and effective communication. This requires someone who can work with minimum direction and can learn how NSG systems operate and hence identify the critical effect of each configuration.

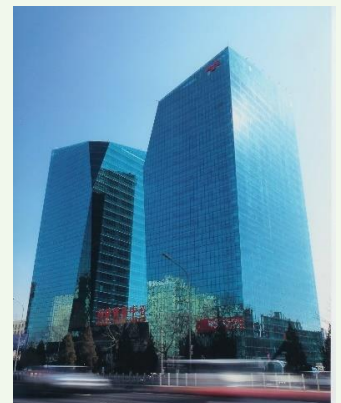

A knowledge of energy basics would be advantageous in addition to advanced numeracy skills and the ability to demonstrate good influencing, interpersonal and communication skills. Suitable external training can be provided where suitable.

A full UK driving licence and car ownership would be an advantage due to limited public transport to the site.

Selection will take the form of an assessment centre, which will include a competency interview, aptitude tests and a Personality Questionnaire.

We give everyone an equal opportunity to contribute to their full potential and harness the richness of ideas.

If you believe you take on the challenge, we very much want to hear from you. Please visit our [website](#) for further details.
