## WHO ARE WE?

The NSG Group is a global leader in glass manufacturing in three business areas: Architectural, Automotive and Technical Glass.

Our mission is to be the global leader in innovative high-performance glass and glazing solutions, working safely and ethically.

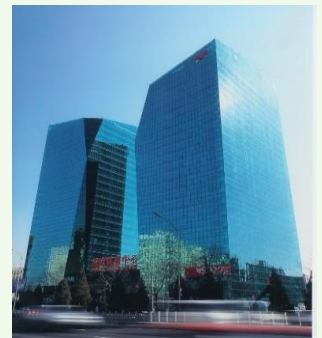

## THE ROLE

A vacancy has arisen for a Technologist at the NSG European Technical Centre to work in the Materials and Products team. The team are responsible for the development of new products for the architectural and automotive strategic business units, where function, performance, and durability are key, and stringent standards and/or customer specifications need to be met.

The role will involve sample manufacture, performing detailed measurements and assessments, and responsibility for carrying out and reporting detailed test plans that can last from a few days to years as part of a project team. Specialist instruments and dedicated test equipment will be used routinely; full training will be provided. The job holder will also be responsible for some items of equipment, overseeing service schedules, ensuring calibration and any other routine maintenance activities are carried out in a timely manner.

With increasing experience there will be the opportunity to develop new test methods and measurements, to contribute to investment plans to maintain and enhance test capability, and to influence the future direction of development projects.

The role may involve process development and production trials on manufacturing sites and therefore overseas travel may be required, typically 1 week or less in duration. In addition, the role will involve general housekeeping arrangements in laboratories, and ensuring relevant HSE and Quality system documents are up to date.

## WHAT ARE WE LOOKING FOR?

### You

- An individual who demonstrates a strong attention to detail and seeks to assure customer satisfaction
- Takes personal responsibility and ownership for achieving results and objectives, and for own and colleagues' safety
- Good oral and written communication skills
- Core skills in IT and Communication – a good working knowledge of Microsoft Excel would be beneficial

### Your Technical Skills

- As a minimum, qualifications such as HND/HNC/NVQ Level 3 (or equivalent) in a relevant discipline e.g. engineering or the physical sciences
- Experience of working in a laboratory environment is essential and experience of spectral measurements or weathering tests would be advantageous
- Knowledge of glass products or processing is a benefit, but full training will be provided

### Benefits

- 37½ hours per week, Monday - Friday
- 25 days holiday plus Public Bank holidays
- Flexible Working Hours Scheme
- Pension Scheme
- Staff Bonus scheme
- On site car parking
- On site canteen
- On site fitness activities and events

A full UK driving licence and car ownership would be an advantage due to limited public transport to the site.

If you believe you take on the challenge, we very much want to hear from you. To apply please send your CV and covering letter to [RecruitmentVacanciesUK@pl.nsg.com](mailto:RecruitmentVacanciesUK@pl.nsg.com) and quote reference **PTML P22-06**.
