A WINDOW TO LUXURY

Pilkington Marine

Pilkington Marine, the specialist marine glazing unit of Pilkington Automotive Finland Oy, is a member of the multinational Pilkington Group Limited, a member of NSG Group from June 2004. The entity is recognized as the world leader of glass in the glass industry. Pilkington, founded in 1826, is a major manufacturer of glass and glazing products for building, automotive and technical markets, with manufacturing facilities in over 25 countries and sales in over 130 countries. Pilkington Marine has extensive experiences of working closely with the shipbuilding industry, offering customers an integrated service from design to installation.

Experience and Enthusiasm

The name of the passenger cruise ships sailing the world’s seven seas often conjures up an image of luxury, a luxury world where sea travel is a real pleasure, not just a means of getting from A to B. Pilkington Marine has been closely associated with the creation of many leading passenger ships, adding an essential ingredient to the magic of travel on sea, viz., transparency.

More than just a supplier of glass, Pilkington Marine takes responsibility for the overall management of glazing projects on a ‘turnkey’ basis. We provide technical expertise, prepare the required drawings, carry out extensive strength calculations and take part in the required certifications. We carefully specify the right glass for each product, manufacture the aluminium and metal frames, select the correct insulators and prepare all the required fittings. We are fully involved at every stage of the vessel’s construction.

Product Development and Innovation

Pilkington Marine is constantly developing new products for its customers. In addition to its broad range of stock glazing, Pilkington Marine is at the leading edge of product development, able to draw on the extensive technical resources of its parent company, Pilkington Glass Limited. This enables us to provide our customers with a wide variety of high quality products for luxury cruise ships.

Pilkington Marine also designs and manufactures unique glass products for most specific customer needs. Whether it is the requirement to fit cutting edge lightweight balcony modules or to design a unique opening glass hatch, Pilkington Marine always aims to give customers a full service.

Pilkington Marine uses high-quality glass to give construction high strength. Strength is further improved when laminated, which provides superior safety, producing glass products well suited to the marine environment. The addition of special coated interlayers enables us to offer distinctive products for specialist applications.

Pilkington Marine’s Product Range

- opening and sliding glass doors for balconies
- sliding glass doors for cabin entrances
- certified fire-resistant glass walls
- glass doors and balcony
- glass balustrades
- panoramic windows
- windshields
- sliding doors
- emergency and glass walls

Quality and High Standards

Pilkington Marine team members know their way around ships. We are familiar with the special conditions to be dealt with as well as with the quality levels our customers expect from us. Installation is carried out by technicians who have years of experience and are kept up to date with continual training covering not only technical but also environmental topics.

Regularly certified by Det Norske Veritas and TÜV SÜD Management Services, we operate within the framework of the International ISO 9001 Standard. On environmental issues, Pilkington Marine is certified to ISO 14001 International Environmental Standard by TÜV, and we pay special attention to the environment from the design stage to the finished product.

Pilkington Marine Customer Care
