

ReCO™

Remote Calibration Overair

ReCO™ – Remote Calibration Overair

Your solution for a quick calibration
after windscreen replacement

 PILKINGTON

What is ReCO™ ?

ReCO™ is our new remote service to support you in remote vehicle diagnostics and ADAS calibration (Advanced Driver Assistant Systems).

With ReCO™ we carry out incoming diagnostics, troubleshooting and calibration – quite simply remotely.

From security gateway activation to OE software solutions – always the right diagnostic software for you.

How does ReCO™ work?

ReCO™ is super easy and ready to use: Simply connect ReCO™ to your vehicle and open a ticket in the web portal. Our Pilkington technician will remotely connect to your device using the ReCO™ OBD connector and perform the appropriate service.

Your benefits

Whatever is coming, we solve it for you!

ReCO™ offers almost 100 percent software coverage thanks to various commercially available multi-brand diagnostic software which is being constantly expanded.

ReCO™ helps you to save costs permanently!

No software costs, no update costs, no annual license costs, no additional training costs.

No matter which new vehicle is coming, ReCO™ is the solution!

ReCO™ also provides software solutions for the latest vehicles (e.g. Security Gateway, DoIP).

Buy, set up and go!

Our sales contact activates the ReCO™ OBD connector at your site: That's it, and you're ready to go.
